Description

- **Application:** Guiding the 19 mm aluminum tube along the polyester wire in shading systems
- **Material:** Galvanized steel
- **Installation:** Mounted onto the polyester wire and then clipped onto the 19 mm aluminum tube

The **Wire Guide (short) 44 mm** is first attached to the **polyester wire** and then clipped onto the **19 mm aluminum tube**. This ensures that the polyester wire provides secure and straight guidance for the tube as it moves the fabric panels. The distance between the aluminum tube and the wire is 44 mm.
