Description

- **Application:** Universal joints for drive shafts in shading and ventilation systems
- **Bearings:** Equipped with high-quality needle bearings for precise and durable motion transfer
- **Adapters:** Screw-on adapters available for a wide range of shaft formats
- **Design:** Slim and space-saving – robust and durable, made of black-coated steel
- **Technical Specs:** Maximum bending angle 34°, torque up to 70 Nm

The **Universal Joints for RW Drive Shafts** ensure reliable power transmission in shading and ventilation systems with variable shaft routing. Thanks to integrated needle bearings, they provide smooth operation under high loads. Optional adapters allow easy screw-on connection to various shaft formats, offering maximum flexibility during installation. With their compact design and black-coated steel construction, these joints are both space-efficient and highly resistant – ideal for demanding environments.
