

Overview

Spring for slip joint (hard) - PU = 50 pcs

Product number: 21100114

Options

PU (Pcs)

Version

Description

- **Application:** Supplement for slip joints in shading systems
- **Material:** High-strength spring steel for enhanced stability
- **Feature:** Up to 2 springs can be used per clamp
- **Packaging Unit:** 50 pcs

Spring for slip joint (hard version) is used to **optimize the clamping performance** of slip joints in greenhouse shading systems. By default, each slip joint is supplied with a soft spring. If higher resistance is needed, the system can be upgraded with up to two hard springs.
