Description

- **Application:** Connection between double film and spiral hose in greenhouse systems
- **Material:** UV-stabilized plastic blend for high durability
- **Function:** EPDM check valve prevents backflow of the injected air
- **Accessories:** Hose clamp – R60-65 / Spiral hose Ø 63 mm
- **Installation:** Mounted using a hose clamp
- **Special feature:** Highly resistant to environmental influences

The **inflation valve for double film including check valve** ensures a reliable connection between the double film and a Ø 63 mm spiral hose. Mounting is carried out using our hose clamp – R60-65. The EPDM check valve prevents the backflow of already injected air, ensuring a stable air cushion.

Thanks to the proven plastic blend, the valve is UV-stabilized and highly durable. Installation is simple and secure using a hose clamp.
