Description

- **Application:** Breathable woven fabric for suspended or laid blackout installations
- **Material:** Open-weave black mesh
- **Width:** 325 cm
- **Feature:** Exceptional air circulation and moisture exchange

PH1-FP Blackout Woven Fabric is a single-layer textile developed for blackout systems that require reliable light-blocking and high breathability. Its open mesh structure enables continuous airflow—ideal for sensitive greenhouse environments where humidity regulation is key.

Thanks to its lightweight, versatile form, it is compatible with both laid and suspended configurations. Curtain tape can be added for system-specific adaptation.
