

Overview

Pinion house protection cover - PU = 25 pcs

Product number: 32200002

Description

- **Application:** Protection of rack-and-pinion systems at sensitive locations in greenhouses
- **Material:** Plastic
- **Special feature:** Single-sided socket for rack protection tube

The **pinion housing cover** is used in combination with rack protection tubes to safeguard rack-and-pinion systems in areas where there is a risk of injury or where contamination from lubricants must be avoided.

The plastic protective housing features a single-sided socket for the rack protection tube and offers a reliable solution for the safe operation of rack systems in greenhouse installations.
