450

Description

- **Application:** Daytime screen fabric for suspended shading systems
- **Material:** High-quality, dimensionally stable fabric with integrated reinforcement bands
- **Shading Rate:** Approx.12%
- **Light Transmission:** Approx. Very high
- **Width:** 350 cm
- **Features:**
 - Capillary textile structure for optimal moisture exchange
 - Excellent thermal insulation
 - Flame-retardant according to DIN 4102-1 (B1)
 - "Made in Germany" – in-house development and production
 - Optional with pre-mounted S-hooks and fabrication available

Fiberfil Lucent is a transparent daytime screen fabric with approx. 12% shading, specially developed for suspended shading systems. Integrated reinforcement bands allow easy mounting with S-hooks, making it ideal for plug-and-play solutions. The capillary fiber structure enables effective moisture exchange and helps maintain a balanced greenhouse environment. Its shape stability and thermal properties make it a durable and efficient solution for modern greenhouse systems.

Note: Price refers to material only. Additional costs for fabrication may apply.
