Description

- **Application:** Connection between double film and spiral hose
- **Material:** UV-stabilized plastic blend for high durability
- **Installation:** Mounted using a hose clamp on the spiral hose
- **Special feature:** Optimal air distribution for film greenhouses
- **Accessories:** Hose clamp R60-65 / Spiral hose Ø 63 mm

The **inflation valve for double film including check valve** ensures a reliable connection between the double film and a Ø 63 mm spiral hose. Installation is carried out using our hose clamp R60-65. The EPDM check valve prevents backflow of the injected air, ensuring a stable air cushion.

Thanks to the proven UV-stabilized plastic blend, the valve is highly durable and resistant to environmental influences. Installation is simple and secure using a hose clamp.

The single-unit packaging is ideal for individual applications and smaller installations.
