Description

- **Application:** Connects motor gearbox sprocket to drive shaft
- **Material:** Galvanized steel
- **Design:** Duplex chain for inline shaft movement
- **Installation:** Pre-punched receptacle for easy shaft insertion - no welding required
- **Benefit:** Increases flexibility of the drive system under dynamic loads and structural movement

The **Lock Chain Coupling KKS 10** provides a flexible connection between the motor gearbox and the drive shaft. Its duplex chain design allows for inline movement, reducing stress on the system during dynamic operation. The pre-punched receptacle enables quick, weld-free installation, making it ideal for greenhouse drive systems.
