Description

- **Application:** Direct fastening of 16 mm twin-wall (LTC) panels to substructures
- **Function:** Prevents panels from being lifted by wind loads
- **Additional Benefit:** Simultaneously serves as a sealing component
- **Installation:** Mounted with sheet metal screws (not included)
- **Suitable For:** 16 mm panel thickness
- **Packaging Unit:** 100 pcs

Storm button for 16 mm twin-wall panels enables safe and secure attachment of LTC panels directly onto existing support structures. It effectively protects the panels from being pulled out by wind pressure and also seals the joints to reduce water or dirt ingress.

Installation is performed using matching sheet metal screws, which are not included in the scope of supply. This fastening solution is ideal for greenhouse construction or translucent roof structures where durability and weather protection are critical.
