Description

The support wire bracket is used for easy fixing of inox- wire onto square tube.

The wire bracket gets clipped and screwed onto the square tube. Thanks to this fixation it can withstand high tension. For screwing you will need a M 6x65-bolt which is not delivered with the product.

A significant advantage of our wire holder is its ability to be repositioned even after the wire has been set. This ensures that the ongoing installation remains flexible and can be continuously adjusted to meet changing requirements.
