Description

- **Application:** Guiding 19 mm aluminum tubes along polyester wires in shading systems
- **Material:** Galvanized steel
- **Installation:** Mounted onto polyester wire, then clipped onto the 19 mm aluminum tube

Wire Guide (short) 13 mm is designed to **securely guide aluminum tubes** along polyester wires in greenhouse shading installations. First attached to the wire, it is then clipped onto the tube, ensuring a straight and stable movement of the fabric panels.

The fixed spacing of **13 mm** between wire and tube supports consistent alignment and smooth operation, especially in suspended shading systems where precise guidance is essential.
