Description

- **Application area:** Fastening wires to greenhouse structures
- **Material:** Galvanized steel for high corrosion resistance
- **Drill holes:** Three holes for flexible mounting options
- **Installation:** Simple striking onto the structure

The **Universal clamp G1** is a versatile solution for securely fastening wires to greenhouse structures. With its three drill holes, it allows flexible installation and adaptation to various mounting points.

Made from galvanized steel, the clamp offers high corrosion resistance and is ideal for long-term use in humid environments such as greenhouses. Its simple striking installation ensures quick and hassle-free setup.

Thanks to its robust design, the Universal clamp G1 provides reliable fixation and is a proven choice for professional applications.
