Description

- **Application:** Fabric guiding in suspended or overlaid greenhouse shading systems
- **Material:** Galvanized steel for excellent corrosion resistance
- **Design:** Tapered ends for easy plug-in assembly
- **Wall Thickness:** 0.8 mm
- **Length:** 6500 mm

The **19/0.8 mm Tapered Steel Tube, Sendzimir-Galvanized** is primarily used for guiding shade fabrics in both suspended and laid-out greenhouse systems. It's also suitable as a guide profile for roller screens with downward-hanging fabrics.

The tapered tube ends allow for a quick and secure plug-in connection. Its galvanized finish offers high corrosion resistance and ensures long-lasting performance even in humid environments.
