Aquafloora 200 is an innovative irrigation system for cultivation tables, consisting of three perfectly matched layers: **Aquatex Groundcover 100** for a stable surface, **Aquafil 120** for uniform water distribution, and a **PE film** to minimize water loss.

Thanks to the seamless bonding of the materials, the mat remains stable and does not shift. With a water storage capacity of approx. 3 liters/m², it ensures efficient water usage.

With a width of **200 cm** and a length of **50 m**, it is ideal for professional use in nurseries and horticultural operations.
