Description

- **Product:** Tree girth measuring fork
- **Measuring ranges:** 6 cm, 8 cm, 10 cm, 12 cm, 14 cm, 16 cm, 18 cm
- **Application area:** Fruit and avenue trees, nurseries
- **Material:** High-quality plastic
- **Function:** Precise measurement of trunk girth
- **Advantages:** Gentle on plants, no sharp edges

The **Tree girth measuring fork** is an essential tool for nurseries and gardeners who need to accurately determine the trunk girth of fruit and avenue trees. It enables quick and reliable measurement across various size ranges from **6 cm to 18 cm**.

Unlike metal measuring forks, this model is made of high-quality plastic, which eliminates sharp edges. This makes the fork especially gentle on plants and prevents damage to the tree.

A practical tool for professional users who value precise and plant-friendly measurement.
