## Description

- **Application:** Adapter for telescopic systems connecting universal joints and steel pipes
- **Material:** Galvanized steel for high corrosion resistance
- **Size:** Suitable for 32 mm pipes with 1.5 mm wall thickness
- **Special features:** Extended version enables use of a spacer roller
- **Compatibility:** Optimized for TransAxle Units and single/double universal joints

The **Extended Adapter Pipe 32 × 1.5 Galvanized** is designed for telescopic systems as a connector between universal joints and steel pipes. Its extended form allows for spacer roller integration, commonly used in TGU TransAxle Units. The galvanized steel build ensures optimal durability in greenhouse environments.
