Description

- **Application area:** Fastening of films in early-harvest tunnels and as planting line with markers for uniform plant spacing
- **Material:** UV-stabilized polyester
- **Breaking load:** 50 kg
- **Length:** 100 m

The **Polyestercord 6 mm** is a braided polyester rope ideally suited for fastening films in early-harvest tunnels. Alternatively, it can be used as a planting line, equipped with markers that enable uniform plant spacing.

Thanks to its UV stabilization, the cord is highly durable and weather-resistant. With a breaking load of 50 kg, it provides strong performance across various applications. Each roll contains 100 m of cord, ensuring sufficient material for practical use.
