Description

- **Application area:** Static connection for 19 mm aluminum pipes
- **Material:** High-quality plastic for a lightweight yet stable connection
- **Installation:** Simple plug-in assembly with coarse knurling for fixation
- **Special feature:** Quick installation without screws

The **Lead edge connector 19 S** is a practical solution for static connection of 19 mm aluminum pipes. It enables fast and secure assembly through a simple plug-in system that is fixed using coarse knurling. Unlike screw-fastened connections, this coupling offers time-saving installation, although the pipes cannot be separated after assembly.

Thanks to its high-quality plastic construction, the coupling is especially lightweight yet stable enough for use in greenhouses and other structures requiring a permanent connection.
