## Description

- **Application:** Connection between double-layer film and spiral hose in greenhouse systems
- **Material:** UV-stabilized plastic compound for high durability
- **Function:** Integrated back-flow flap (EPDM) prevents reverse airflow
- **Installation:** Secured with a hose clamp
- **Feature:** Highly resistant to environmental influences
- **Packaging Unit:** 40 pcs

**Air transfer gasket with back-flow flap** ensures a secure connection between the double-layer greenhouse film and the spiral hose. The integrated EPDM flap prevents air from flowing back, maintaining a consistent air cushion for effective insulation.

Thanks to its UV-stabilized plastic composition, the gasket is exceptionally durable and suitable for outdoor greenhouse environments. Installation is straightforward using a standard hose clamp.
