Description

- **Application area:** Guiding irrigation hoses in garden and greenhouse installations
- **Material:** Galvanized metal anchor with plastic guide for high stability
- **Total length:** 57 cm
- **Metal spike length:** 31 cm
- **Plastic guide length:** approx. 18 cm

The **Galvanized hose guide roller with plastic roller** enables precise guidance of irrigation hoses around corners and obstacles. This protects both the hose and adjacent areas such as garden beds or building corners from damage.

Thanks to the long metal spike and sturdy plastic guide, the hose roller remains securely anchored even under strong pulling forces.

This solution is particularly suitable for firm soils and demanding garden or greenhouse environments.
