Description

- **Application:** Connection between inflation fan and film inflation valve in greenhouse structures
- **Material:** UV-stabilized plastic for high durability
- **Length:** 6 meters
- **Feature:** Can also be used to connect two film inflation valves

Jumper hose D-63 mm, grey is an essential component for double-inflated film greenhouses. It connects the inflation fan with the film inflation valve or, alternatively, serves to link two air transfer gaskets.

Thanks to its UV-stabilized plastic composition, the hose is especially durable and resistant to environmental conditions. Its 6-meter length allows for flexible installation in various greenhouse layouts.
