Description

- **Application:** Connects the chain wheel of RW240–RW800 gear motors to the drive shaft
- **Tube size:** 1″
- **Material:** Galvanized steel
- **Mounting:** Bolted design with pre-punched receptacle for easy installation
- **Features:** Duplex chain allows axial movement of the shaft for greater flexibility

The **Bolted chain coupling for RW240/400/600/800 – 1″ tube** is a robust connector for high-torque Ridder gear motors. It ensures a flexible and secure connection to the drive shaft, compensating for misalignment and structural shifts in greenhouse systems.
