## Description

- **Application area:** Connection between double film and spiral hose
- **Material:** UV-stabilized plastic blend for high durability
- **Installation:** Secured to the spiral hose using a hose clamp
- **Special feature:** Optimized air flow for film greenhouses

The **Air Transfer Gasket without back-flow flap** is an essential component for film greenhouses with double-layer film. It enables a reliable connection between the double film and the spiral hose, ensuring optimal air flow.

Thanks to the proven UV-stabilized plastic blend, the valve is highly durable and resistant to environmental influences. Installation is simple and secure using a hose clamp to fasten it to the spiral hose.

The single-unit packaging is ideal for individual applications and smaller installations.
