Description

- **Application:** Shading screen for greenhouse installations
- **Material:** Knitted fabric with white and transparent bands for controlled light diffusion
- **Width:** 325 cm
- **Feature:** Acrylic yarns promote optimized moisture balance

EcoScreen 70 FR white - 325 cm is a high-quality climate screen designed to allow diffuse sunlight to enter, ensuring plants can continue photosynthesizing efficiently. The fabric provides both light control and thermal buffering throughout the greenhouse.

It functions as both a shading and energy screen, with acrylic yarns contributing to better humidity management. This lightweight textile supports a more stable and efficient growing climate for various horticultural setups.

Note: Listed price refers to unprocessed fabric only. Tailoring or cutting services are available on request and may be billed separately.
