## Description

- **Application:** Push rod for shading and ventilation systems in greenhouses
- **Material:** Galvanized steel for excellent durability and corrosion resistance
- **Wall Thickness:** 1.5 mm
- **Length:** 6500 mm
- **Highlight:** Tapered ends for easy plug-in connection and secure fastening

The **27/1.5 mm Tapered Steel Tube, Sendzimir-Galvanized - 6500 mm - Loose** functions as a push rod for shading and ventilation systems in greenhouses. Its tapered ends allow for quick insertion and screwing, ensuring a firm and stable connection.

For secure fastening, we recommend using bolt and nut type 27.32 for steel tubes. The galvanized surface enhances corrosion resistance, making it ideal for long-term use in demanding environments.
