Description

- **Application:** Even winding of drive cables in greenhouse shading systems
- **Material:** Impact-resistant plastic for extended durability
- **Capacity:** Winding length of 570 cm
- **Installation:** Can be retrofitted onto the drive shaft
- **Feature:** Two-piece design with hose clamp connection
- **Packaging Unit:** 12 pcs

Cable drum 1.5" - - type III enables structured and uniform winding of drive cables in greenhouse shading systems thanks to its pre-grooved plastic surface. This prevents cable friction and ensures smooth cable guidance.

The two-shell housing allows for retroactive mounting on the drive shaft. The shells are joined using a hose clamp, while the drum is fixed in place with a set screw.

Made from impact-resistant plastic, the drum is designed to protect cables and prolong service life. Suitable for cable diameters up to 3 mm.
