## Description

- **Application:** Digital positioning sensor for Ridder RW gear motors
- **Signal output:** 4-20 mA (also configurable to 0-5 V or 0-10 V)
- **Technology:** Contactless Hall sensor with magnetic axis
- **Accuracy:**  $\pm 0.04\%$  of the learned measuring range
- **Compatibility:** All RW motors with RSU limit switch system
- **Features:** Reverse-polarity protection, LED status display, reference input
- **Ridder Article No.:** 502687

The **RPU 24V / 4-20 mA / V3** is a high-precision digital positioning unit for Ridder RW motors. It continuously reports the motor position to a climate controller and is ideal for ventilation, shading, and lifting systems. Its contactless design ensures maintenance-free operation and long-term reliability.
