

Overview

Tower Roller Plus guide incl. guiding rails cover

Product number: 37023726

Description

<p>The Tower Roller Plus Set is part of our Tower Roller Plus drive system, which features the following properties:</p> Drive system for medium and large roller screens, as well as rollable side vents and room partitions. Suitable for system lengths up to 120 meters with an extremely narrow installation depth of approximately 80 mm. Reduced weight, assembly time, and costs. Extremely durable and almost maintenance-free, thanks to the high-strength plastic rollers and the standard anodized aluminum profile. Reduced risk of accidents due to completely integrated and covered counterweights and pulleys. Integrated cable routing with energy chain. Compatible with all common motors (counterweight is adjusted accordingly).
