Description

- **Application:** Static connection of 19 mm aluminum tubes
- **Material:** High-quality plastic for lightweight yet strong bonding
- **Installation:** Simple plug-in assembly with coarse surface interlock
- **Feature:** Quick screwless installation - non-detachable after assembly
- **Packaging Unit:** 250 pcs

Lead edge connector 19 S offers a fast and secure solution for the **static joining of 19 mm aluminum tubes** in greenhouse shading systems. The component utilizes a plug-in system with coarse texturing for firm anchoring—allowing efficient installation without tools or screws.

Its plastic design provides a lightweight yet robust connection ideal for permanent setups in harsh environments. Once assembled, the connection remains fixed and is not intended for disassembly, making it particularly suitable for stable lead-edge frames or fixed fabric tensioning applications.
