Description

- **Application:** Even winding of drive cables in greenhouse shading systems
- **Material:** Impact-resistant plastic for long-term durability
- **Capacity:** Winding length 570 cm
- **Installation:** Can be retrofitted onto the drive shaft
- **Feature:** Two-shell design with hose clamp connection
- **Packaging Unit:** 12 pcs

Cable drum 1" – type III ensures precise and uniform winding of drive cables in greenhouse shading systems, thanks to its pre-grooved plastic surface. This eliminates cable friction and guarantees a smooth operating path.

The two-piece construction allows for retroactive installation on the drive shaft. The drum halves are secured with a hose clamp, while fixation on the shaft is carried out using a set screw.

Made of impact-resistant plastic, the drum protects the cable and extends its lifespan. Suitable for cable diameters up to 3 mm.
